

GENERAL INFORMATION

Twin Scania 800hp engines and water-jet propulsion provide excellent manoeuvrability, good performance (22kn) and low fuel consumption (200l/hr).

The mid superstructure suits construction and O&M roles, with a large forward working deck and crane for self-loading from quay. All cargo is secured forward for easy transfer by transition piece cranes/davits coupled with sufficient space on the aft deck for pallet boxes and small cargo.

1.8m significant wave transfer capability, ideal for inshore sites.
